Shipped	Received
1. Intermodal-Wholesale	1. Intermodal-Wholesale
2. Coal	2. Hazardous Waste
3. Hazardous Waste	3. Coal
4. Petroleum Products	4. Assembled Autos
5. Non-metallic Minerals	5. Liquid Petroleum Gas

* By volume

SAFETY, SERVICE & OPERATIONAL EXCELLENCE = GROWTH

The Union Pacific team is focused on being the best in **Safety, Service and Operational Excellence**. It defines how we win and grow: Safely delivering the service we sold our customers, investing in our railroad, using our resources and assets efficiently, and proactively engaging with our teams and stakeholders.

UNION PACIFIC IN UTAH

Union Pacific's presence in Utah can be summed up in one word: "Done." Promontory Summit marks the culmination of arguably one of the most important feats in America's history, the completion of the transcontinental railroad – where east met west.

Since May 10, 1869, Union Pacific's operations have grown and developed Utah. Today, Utah is a vital crossroads for Union Pacific. Main lines radiate in every direction from Salt Lake City-Ogden, moving metals, minerals, manufactured products, coal, autos and other commodities safely and efficiently across the country.

HELPING COMMUNITIES THRIVE

Union Pacific proudly supports Utah organizations through its [Community Ties Giving Program](#). In 2023, the company provided more than \$467,000 to local groups, including Junior Achievement of Utah, Utah Clean Air Partnership and Success in Education Foundation. Grants were awarded to programs meeting one of Union Pacific's philanthropic objectives: helping communities prevent and prepare for accidents and emergencies; fostering skills development for family-supporting jobs; creating vibrant community spaces; and advancing the health of our environment.

INVESTING IN SAFETY

The safety of Union Pacific's employees, customers and the communities it operates in is the company's No. 1 priority. From 2019-2023, Union Pacific invested more than \$398 million strengthening Utah's transportation infrastructure.

Union Pacific works in tandem with local law enforcement officers to address community safety around railroad tracks. The goal is decreasing crossing accidents and, ultimately, eliminating them.

DRIVING INNOVATION

Union Pacific's rails are technological runways enhanced with GPS, specialized sensors and, in some areas, Positive Train Control (PTC). PTC is an advanced system designed to automatically stop a train before certain incidents occur, such as train-to-train collisions and derailments caused by excessive speed or movement through misaligned track switches. PTC is installed on 100% of required Union Pacific rail lines; implementation efforts also ensured interoperability with other freight and passenger railroads operating on our tracks.

Unmanned Aerial Systems (UAS), or drones, are part of Union Pacific's safety toolkit, collecting valuable information at derailment sites and natural disaster incidents, allowing the company to assess its infrastructure and respond while keeping employees out of harm's way. Union Pacific is researching [autonomous drone infrastructure inspection technology](#), enabling the company to fly drones in places without GPS coverage, such as within or under a large metal bridge or into deep culverts.

ENVIRONMENTAL INITIATIVES

Several initiatives and innovative technologies are helping achieve our environmental goals in Utah.

New road locomotives that meet the EPA's stringent Tier 4 emissions standards have been added to UP's fleet over the last few years, reducing particulate emissions by as much as 90% during operations. The new locomotives dramatically impact fuel efficiency.

One train can take several hundred trucks off Utah's already congested highways. A Union Pacific train can move one ton of freight 454 miles on a single gallon of diesel, generating a carbon footprint that is 75% less than trucks.

The reopening of the Great Salt Lake Causeway, a major regional project, required a broad array of stakeholders (regulatory, environmental, and commercial) to develop a program to restore north-south flow of water in the lake. This work was environmentally essential. In 2023, Union Pacific assisted the state of Utah in shoring up the lake, after Utah Gov. Spencer Cox issued an emergency order to raise the causeway's berm by five feet to capture runoff from the season's heavy snow. Union Pacific donated and transported the rock, as well as helped coordinate the project, quickly and efficiently. Union Pacific is proud to continue working in collaboration with regulatory partners to support the lake's health.

Union Pacific's vision of building America involves protecting and strengthening the environment.

AMERICA'S PREMIER RAILROAD

Union Pacific Railroad is the principal operating company of Union Pacific Corporation (NYSE: UNP). One of America's most recognized companies, Union Pacific Railroad connects 23 states in the western two-thirds of the country by rail, providing a critical link in the global supply chain. From 2014-2023, Union Pacific invested approximately \$34 billion in its network and operations to support America's transportation infrastructure. The railroad's diversified business mix includes its Bulk, Industrial and Premium business groups. Union Pacific serves many of the fastest-growing U.S. population centers, operates from all major West Coast and Gulf Coast ports to eastern gateways, connects with Canada's rail systems and is the only railroad serving all six major Mexico gateways. Union Pacific provides value to its approximately 10,000 customers by delivering products in a safe, reliable, fuel-efficient and environmentally responsible manner.
